

Committed to American Made

LOC Scientific, Inc. is committed to providing our customers with laboratory furniture, fume hoods, counter tops and accessory products manufactured and/or fabricated in the United States of America. We are committed, along with our suppliers, to supporting the economy of the United States of America while maintaining high quality standards through the laboratory products we represent.

LOC Scientific, founded in 1994 in Buford, GA, is an American owned company with an American workforce and relationships with U.S. manufacturers and fabricators. We are proud to be providing American made laboratory furniture and accessories to global customers.

Westinghouse Poster. "In 1942, Pittsburgh artist J. Howard Miller was hired by the Westinghouse Company's War Production Coordinating Committee to create a series of posters for the war effort. One of these posters became the famous "We Can Do It!" image — an image that in later years would also become "Rosie the Riveter," though not intended at its creation. Miller based his "We Can Do It!" poster on a United Press photograph taken of Michigan factory worker Geraldine Doyle. Its intent was to help recruit women to join the work force. At the time of the poster's release the name "Rosie" was not associated with the image. The poster — one of many in Miller's Westinghouse series — was not initially seen much beyond one Midwest Westinghouse factory where it was displayed for two weeks in February 1942. It was only later, around the 1970s and 1980s, that the Miller poster was rediscovered and became famous as 'Rosie The Riveter.'
